

Mueller Maxi-Range Pipe Coupling

Mueller Maxi-Range Pipe Couplings connect any two pieces of pipe of similar nominal size without disassembly, or adapting end rings or transition gaskets. The Maxi-Range coupling is available 2" - 12". This ductile iron sleeve is rated at 250 psi and allows

for up to ± 5 degrees pipe deflection during installation. The coupling interior and exterior has a fluidized bed applied Rilsan Nylon 11 coating. Using Mueller Maxi-Range Couplings saves time and reduces inventory.

- ❑ Strong construction – Center ring and end ring are ductile iron.
- ❑ Corrosion resistant – coated with fluidized bed applied Rilsan Nylon 11.
- ❑ EPDM gaskets – seal over a wide range of pipe O.D. and exterior surface conditions.
- ❑ 250 psig (1724 kPa) working pressure

- ❑ Standard Cor-Ten Track head Bolting – with zinc corrosion protective coating and special shoulder under the head to prevent spinning while tightening; 304 stainless steel option.
- ❑ Fully assembled – use as received without disassembly, modification, or parts change-outs.
- ❑ Accommodate ± 5 degrees of pipe deflection
