SENTINEL 250™  
with Storz connector

## SENTINEL 250™ Storz Connectors

Storz connectors are available through your U.S. Pipe Valve & Hydrant Division Sales Representative as a factory installed option on our SENTINEL 250 series fire hydrants. These adaptors thread directly into the hydrant upper barrel as shown. Storz connectors enable fire departments to quickly connect their hoses to the hydrant pumper outlet without special adaptors. Storz connectors eliminate the problem of cross threading and promote mutual aid between fire districts.

This option is also available on our Metropolitan M-94 fire hydrant.
